Additional comments - Seminars:

Students are divided into **4 (four)** seminar groups. Each group works on 2 (two) seminar topics (theme titles), jointly on searching the literature and making a presentation, and choose one representative who presents the work on the day of the seminar.

The seminars themselves are coordinated by teachers who can ask questions to the presenter and members of the seminar group (which is desirable, in order to determine the activity of the whole group), and finally give a grade for the seminar group, from 1 to 5, which will be taken into account at the exam) and enter it on the record list. Seminars are held during the week of the practicals (P II), 13:00 to 14:30 h. All students are required to attend seminars (as prescribed by the regulations of faculty), and records will be kept. All students who miss the same are required to pass the colloquium from the missing part of the material, as a prerequisite for taking the exam (all students will be notified in a timely manner, considering this subject).

When making presentations, use previously established rules (introduction, basics, pathology...).

RADIOLOGY CLASSES ARE PLANNED 2.12.2021 – 17.12.2021.

LECTURES: 7 working days

SEMINARS: 8 working days

PRACTICALS: 6 working days

EXAM (I.) will be held on Thursday, 23.12.2021.
