

Dear colleagues,

the gynecology internship starts.

The course Clinical rotation: Gynecology contains 100 hours and is performed during 2 weeks.

Teaching consists of seminars and exercises. Students are required to actively participate in classes from seminars and exercises.

Seminar topics are given and students should make a presentation in powerpoint on the given topic.

Each student is obliged to make a presentation on a given topic and present the seminar.

I am sending the seminar topics and the name and surname of the student who should do the seminar.

1. Diagnosis of pregnancy - Nail Al Bayati
2. Urgent condition in gynecology - Klara Sofie Fischer
3. Preterm birth: definition & guidelines - Moritz Friemel
4. Differential diagnosis of convulsions in pregnancy - Leon Ludwig Kuhl
5. Postnatal complications - Barbara Marčić
6. Antenatal care - Itahiza Zambrano Marerro
7. Urgent condition in obstetrics - Karlo Kezić
8. Diagnostic procedures and prevention of gynecological malignancies – Katerina Sekulovski
9. Irregular uterine bleeding - Marija Car
