Cochrane is a worldwide nonprofit that helps people use evidence when making health care decisions by developing and promoting the use of Cochrane systematic review articles published in the Cochrane Library. These review articles provide insight into the latest and most reliable health research based on which people can make informed decisions about their own health and health policies. Cochrane systematic reviews are considered the gold standard of evidence-based information.

Cochrane Bosnia and Herzegovina (Cochrane BH) was officially established on May 12, 2018 at the School of Medicine, University of Mostar as the affiliation of Cochrane Croatia.
